NEW RESIDENTIAL CONSTRUCTION IN SEPTEMBER 2010

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for September 2010:

BUILDING PERMITS

Privately-owned housing units authorized by building permits in September were at a seasonally adjusted annual rate of 539,000. This is 5.6 percent (\pm 1.4%) below the revised August rate of 571,000 and is 10.9 percent (\pm 2.3%) below the September 2009 estimate of 605,000.

Single-family authorizations in September were at a rate of 405,000; this is 0.5 percent $(\pm 1.3\%)^*$ above the revised August figure of 403,000. Authorizations of units in buildings with five units or more were at a rate of 111,000 in September.

HOUSING STARTS

Privately-owned housing starts in September were at a seasonally adjusted annual rate of 610,000. This is 0.3 percent $(\pm 10.3\%)^*$ above the revised August estimate of 608,000 and is 4.1 percent $(\pm 12.0\%)^*$ above the September 2009 rate of 586,000.

Single-family housing starts in September were at a rate of 452,000; this is 4.4 percent $(\pm 13.9\%)^*$ above the revised August figure of 433,000. The September rate for units in buildings with five units or more was 150,000.

HOUSING COMPLETIONS

Privately-owned housing completions in September were at a seasonally adjusted annual rate of 648,000. This is 7.3 percent $(\pm 14.3\%)^*$ above the revised August estimate of 604,000, but is 10.1 percent $(\pm 13.6\%)^*$ below the September 2009 rate of 721,000.

Single-family housing completions in September were at a rate of 501,000; this is 4.8 percent $(\pm 14.2\%)^*$ above the revised August rate of 478,000. The September rate for units in buildings with five units or more was 138,000.

New Residential Construction data for October 2010 will be released on Wednesday, November 17, 2010, at 8:30 A.M. EST. Our Internet site is: <u>http://www.census.gov/newresconst</u>

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 3 months for total starts, and 5 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ($\pm 3.2\%$) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised about two percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

* 90% confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
