**NEW RESIDENTIAL CONSTRUCTION IN DECEMBER 2009**

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for December 2009:

**BUILDING PERMITS**

Privately-owned housing units authorized by building permits in December were at a seasonally adjusted annual rate of 653,000. This is 10.9 percent ( $\pm 2.4\%$ ) above the revised November rate of 589,000 and is 15.8 percent ( $\pm 2.9\%$ ) above the December 2008 estimate of 564,000.

Single-family authorizations in December were at a rate of 508,000; this is 8.3 percent ( $\pm 1.2\%$ ) above the revised November figure of 469,000. Authorizations of units in building with five units or more were at a rate of 127,000 in December.

An estimated 571,600 housing units were authorized by building permits in 2009. This is 36.9 percent ( $\pm 1.0\%$ ) below the 2008 figure of 905,400.

**HOUSING STARTS**

Privately-owned housing starts in December were at a seasonally adjusted annual rate of 557,000. This is 4.0 percent ( $\pm 9.3\%$ )\* below the revised November estimate of 580,000, but is 0.2 percent ( $\pm 11.5\%$ )\* above the December 2008 rate of 556,000.

Single-family housing starts in December were at a rate of 456,000; this is 6.9 percent ( $\pm 8.5\%$ )\* below the revised November figure of 490,000. The December rate for units in buildings with five units or more was 92,000.

An estimated 553,800 housing units were started in 2009. This is 38.8 percent ( $\pm 1.4\%$ ) below the 2008 figure of 905,500.

**HOUSING COMPLETIONS**

Privately-owned housing completions in December were at a seasonally adjusted annual rate of 768,000. This is 11.2 percent ( $\pm 13.6\%$ )\* below the revised November estimate of 865,000 and is 25.3 percent ( $\pm 8.6\%$ ) below the December 2008 rate of 1,028,000.

Single-family housing completions in December were at a rate of 503,000; this is 11.1 percent ( $\pm 10.2\%$ ) below the revised November rate of 566,000. The December rate for units in buildings with five units or more was 245,000.

An estimated 796,000 housing units were completed in 2009. This is 28.9 percent ( $\pm 3.0\%$ ) below the 2008 figure of 1,119,700.

*New Residential Construction data for January 2010 will be released on Wednesday, February 17, 2010, at 8:30 A.M. EST.*

**EXPLANATORY NOTES**

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 4 months for total starts, and 5 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ( $\pm 3.2\%$ ) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised about two percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

\* 90% confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
