Manufacturing Technology Orders Back on Track for Strong 2017

Manufacturing technology orders in September continued their upward trend, ending the third quarter on a strong note. According to the latest U.S. Manufacturing Technology Orders Report, bookings for September 2017 were up 6 percent from August and posted a year-to-date figure 5 percent higher than the first nine months of 2016. The monthly total of \$403 million fell short of September 2016 by 26 percent, a typical drop-off in odd-numbered years when IMTS, the largest manufacturing technology show in the Americas, does not occur.

The rough edges of the recovery continued to expose themselves. Aerospace and medical equipment, chief contributors to new capital equipment investment over the past eight months, were down 26 percent and 40 percent respectively from August. Order activity from the automotive industry had been weak during the third quarter but rose 11 percent in September, surprising some analysts who had expected auto orders to remain weak till December.

“While there is recovery in market conditions for manufacturing technology, it’s at a more gradual pace than typically seen due to a sentiment of caution around manufacturing,” said Doug Woods, President of AMT – The Association For Manufacturing Technology. “Manufacturers are concerned about Washington’s impact on economic growth and pace of technological change, as well as the general evolution in technology. It is necessary for companies to invest in current technologies to stay competitive, but they’re doing so at a moderate pace.”

Regionally, the North Central West, Southeast and Northeast regions as reported by USMTO benefited from strong activity in contract machining shops, forging and stamping, automotive, and consumer electronics. Notably, orders from the consumer electronics and computers sector were up 132 percent nationally. The West region also saw gains in September, driven by contract machining shops and regional activity in aerospace.

The key leading indicators for manufacturing technology are positive and AMT analysis suggests an acceleration in order activity at the close of 2017. AMT staff are available to provide further insight on economic and technology trends for the manufacturing industry.

The United States Manufacturing Technology Orders (USMTO) report

These numbers and all data in this report are based on the totals of actual data reported by companies participating in the USMTO program. This report, compiled by AMT – The Association For Manufacturing Technology, provides regional and national U.S. orders data of domestic and imported machine tools and related equipment. Analysis of manufacturing technology orders provides a reliable leading economic indicator as manufacturing industries invest in capital metalworking equipment to increase capacity and improve productivity.

About AMT – The Association For Manufacturing Technology

AMT represents U.S.-based builders and distributors of manufacturing technology – the advanced machinery, devices, and digital equipment that U.S. manufacturing relies on to be productive, innovative, and competitive. Located in McLean, VA, near the nation's capital, AMT acts as the industry's voice to speed the pace of innovation, increase global competitiveness and develop manufacturing's advanced workforce of tomorrow. With extensive expertise in industry data and intelligence, as well as a full complement of international business operations, AMT offers its members an unparalleled level of support. AMT also produces IMTS – The International Manufacturing Technology Show, the premier manufacturing technology event in North America.

IMTS – International Manufacturing Technology Show

The largest and longest running manufacturing technology trade show in the United States is held every other year at McCormick Place in Chicago, Ill. IMTS 2018 will run Sept. 10-15. IMTS is ranked among the largest trade shows in the world. Recognized as one of the world's preeminent stages for introducing and selling manufacturing equipment and technology, IMTS attracts more than 114,000 visitors from every level of industry and more than 112 countries. IMTS is owned and managed by AMT – The Association For Manufacturing Technology. www.IMTS.com

\$ = millions of dollars

P – preliminary

R – revised

* – percent change greater than 1,000%

Totals may not match due to rounding

Note on fields marked D: Due to a change in survey participants the year over year comparison number for Metal Forming and Fabricating is not an accurate reflection of the data. We have adjusted the data for the past 12 months to take this change into consideration. The new chart reflects a consistent year over year comparison of the data at the current participation level.
